

Theisen's Learn To Skate Fact Sheet

By the numbers

6: Lessons per session

8: Levels of classes that teach ice skating basics

10: Maximum number of children in each class

40: Average number of students enrolled each session

About us

Skating lessons were offered at Dubuque's Five Flags Center many years ago, but were suspended in the 1980's and did not resume again until Mystique Community Ice Center opened.

Mystique Learn To Skate began classes in the fall of 2010 and has run a year-round program for the past three years. It uses curriculum from the United States Figure Skating Association, which is the organization that produced skaters such as Michelle Kwan, Brian Boitano and Kristi Yamaguchi. Learn To Skate also has been approved by the Professional Skaters Association.

Although it is known for developing world-class figure skaters, the organization's Basic Skills program is designed to teach skating fundamentals. It is ideal for aspiring hockey players, figure skaters and speed skaters, along with those who simply want to skate recreationally.

What we do

Mystique Learn To Skate is open to skaters ages 4 and up. Our aim is to encourage ice skating and improve the quality of skating at all levels. We want to:

*Teach correct technique

*Promote health and physical fitness

*Give skaters the skills to either skate for fun for the rest of their lives or to make them more competitive in their ice sport.
